**RRS Under Dash Power Brake Booster/Master Cylinder Kit** comes complete with master cylinder & booster, **RRS** designed pedal box (tower) complete with all mounting hardware as a straight bolt in replacement for both auto(shown) & manual (brake & clutch pedal)

The **RRS** Advantage –

- Enables fitment of big block & new modular v8s engines
- Dual reservoir system removes hazard of original single reservoir master cylinder failure
- Precision roller bearing races on bell crank assembly
- Simple bolt in construction
- Compact 36cm wide by 21cm tall including brake pedal.
- Comes complete in either manual shift or automatic pedal configurations.
- Manual shift system set up for hydraulic clutch
- Suitable for either disc/ drum or disc/disc brake systems .( you add your own proportional valve)
- Uses only top quality components from trusted Australian & offshore manufacturers
- Master Cylinder bore size 1”

The advantage of installing **RRS**

- Completely new pedal box assembly , no more worn bushes
- Simple to install
- Cleans up firewall for a more custom look
- Ample clearance for big block & new modular V8 engines.

**Left Hand and Right Hand application available**
